

One Energy is changing the way businesses view and utilize wind energy. We develop and deliver projects with utility scale, megawatt class wind turbines for private businesses with large electric appetites. The One Energy family of companies delivers project assessment, development, engineering, procurement, construction, finance, and operations.

Headquartered in Findlay, Ohio, One Energy is the trusted expert in *Wind For Industry*®. One Energy is growing, and we are looking to add a qualified Surveyor to our team.

SUMMARY OF FUNCTIONS:

The Professional Surveyor will be primarily responsible for collecting accurate data points, assisting in property research, and staking sites for construction.

2 | MAJOR DUTIES AND RESPONSIBILITIES:

- Determine the exact location of important features based on known reference points
- Complete site layout activities using GIS and GPS equipment
- Research land records, survey records, and land titles
- Locate official land boundaries and easements
- Maintain survey records throughout project and maintain as-builts post construction
- Prepare reports and drawing packages
- Communicate with entities affiliated with project, i.e. clients, government agencies, and others
- Draft deeds, leases, and other legal documents
- Provide expert testimony in court regarding survey work

3 | SKILLS:

- Bachelor's degree and Professional Surveyor License
- Minimum of 1 yr. of relevant work
- Detail-oriented and thorough
- Excellent verbal communication skills
- Strong problem solving and analysis skills
- Self-directed and self-driven
