

Survey Crew Chief

Are you a Survey Crew Chief seeking purpose, challenge, and talented colleagues? Would you like to grow your career managing a diversity of site projects of increasing scale and complexity? CESO is a small firm with large firm project opportunities: shopping centers, fueling and convenience stores, restaurants, urgent care centers and large residential developments, among others. We establish long-term, meaningful relationships with clients focused on building multi-unit national footprints and integrate with their teams to help them design, manage and develop their brand across the country. We develop leaders and empower staff to use their gifts to impact the world through service – to our clients, to our families, and to our communities. We subscribe to the mission “finding purpose through serving others,” so if this speaks to you, let’s connect!

As a Land Surveyor Crew Chief, you will direct the field activities of a one or two-person survey crew for a wide range of residential, commercial, retail, and energy projects, locally and regionally. Operating the latest in survey technology and performing survey calculations, you’ll complete both preliminary boundary and topographic surveys as well as construction surveys for a wide variety of projects.

We develop and inspire our Survey Crew Chiefs through training and coaching on and off the job. CESO is a principle-centered organization, thinking and acting in alignment with strong values of service, integrity and authenticity. We believe that work should be more rewarding than just a paycheck. In addition to a comprehensive benefit and compensation program, we create memories and friendship through our employee and service events including lunches, birthday celebrations, outings, and community service opportunities.

Our Survey Crew Chiefs have at least 2 years of experience in leading a survey crew and a minimum of 4 years’ total surveying experience. You’ll have a passion for learning new things and solving complex problems. A working knowledge of AutoCAD Civil 3D is beneficial but not required.

If this fits you, we look forward to hearing from you! CESO is an EEO employer – M/F/Veterans/Disabled.
