

Job Description:

Barrington is looking for a Field Surveyor possessing the ability to operate as part of a two-man survey crew and also as a one-man crew utilizing GPS and Robotic equipment. Duties include research and preparation for assigned projects, completing field surveys, construction staking, and post processing field data for use by office design personnel. A valid Ohio driver's license is required. Professional registration in the State of Ohio is a plus, but not required. Please send resume to daven@barringtoncgi.com.

Barrington Info:

Founded in 1983, Barrington Consulting Group is an Ohio-registered engineering and surveying company. We have been servicing clients in Lake, Geauga, Cuyahoga, Lorain, Summit, Portage, and Ashtabula counties for more than 30 years. Today we are licensed in four states – Ohio, Kentucky, Pennsylvania and West Virginia. Our engineers and surveyors provide clients with quick and accurate responses to their questions and directives, giving them the individual service and personal attention they deserve. Trust, reliability, excellence, and our valued customers provide the foundation upon which our impeccable reputation among clients and peers is built. We earned our reputation by investing in state-of-the-art technology and equipment, and by maintaining a staff of highly trained professionals through continuing education and real-world training. Our Mission: Responding to the changing demands and desires of today's client. We concentrate on our commitment to overall quality, design excellence, and customer satisfaction. Our customers remain our foundation.
