

McGill Smith Punshon, Inc.

McGill Smith Punshon, Inc. (MSP) is a multi-discipline design firm composed of experienced architects, engineers, landscape architects, planners, and surveyors. Collaboration between these disciplines, along with a commitment to client communication and project planning, has given MSP an impressive level of success for over 160 years.

McGill Smith Punshon, Inc., is seeking qualified applicants who desire new challenges with the opportunity to acquire new responsibilities. Our innovative approach to training personnel for multiple roles provides individuals with diversified skills needed in the surveying industry. MSP has immediate opportunities in the following positions:

Survey Project Manager

Position for experienced survey technician and/or crew chief looking for opportunity for advancement or an experienced Professional Surveyor/Project Manager looking for an opportunity with a diversified company. Candidate should be familiar with all aspects of surveying including boundary resolution, topographic surveys, ALTA surveys and construction layout. Required skills include: AutoCAD Civil 3D, Trimble Business Center, Microsoft Office, proposal/contract writing, client relationship development, mentoring, interface with other disciplines, invoicing and management of projects to completion.

Survey Crew Chief

Full time crew chief required to perform all duties necessary to work on boundary, topographic and construction layout projects. Must be familiar with all phases of surveying including deed research, calculations, data collection and reduction, robotic total station, GPS and PC based software. Growth opportunity for ambitious surveyor with a mix of field and office assignments. AutoCAD Civil 3D skills a definite plus.

Survey Instrument Operator

Full time instrument operator required to assist survey crew chief in field operations. Duties include: maintain and operate all instruments and measuring devices necessary to complete a variety of work assignments, note keeping and calculations. Minimum 2-4 years experience in field survey work. AutoCAD Civil 3D skills a definite plus.
